

# Splitting words into syllables etc.

If you choose a *Split* words game (usually for longer words) you are asked to set the game up ready to play. Do this by **splitting** at least 4 of the words from the list in any suitable way (into syllables etc).

As you move across the words, click where you want the splits to be placed.

To delete a split, highlight it, then click on it to remove it.

When you have placed your splits, they will be ready to play in the split word games.

To remove splits from the whole list, click on the delete button.

When you move to another list, your splits will not be kept. If you want to save them, click on the save button.

If you un-tick the *Use splits* box, the splits will not be used in the reading and spelling games.

You can split words in your own lists.

Tick the *Add splits* box

Follow the instructions above.
